Erik Neafus

Web Developer

👤 Profile

I have just recently completed a web development bootcamp through the University of Minnesota. This bootcamp focused on the MERN stack, teaching technologies such as JavaScript, React, Express, MongoDB, MySql, and Node.js. Throughout the three months, I was given 2-3 projects to complete each week, as well as three collaborative group projects.

As a former framing carpenter, I have developed a strong foundation in problem-solving and attention to detail. I was part of a large team, as well as leading my own smaller team, working together to build new apartments. As such, communication and team work were regular aspects of the job, to ensure that my team's work would fit in seamlessly with another team.

💼 Employment History
